**Help**

Jellyfish   Octopus   Walrus   Starfish   Sea anemone  
Seal   Oyster   Dolphin   Seahorse

# Classic Aves

Birds are feathered, winged and egg-laying animals. There are around 10,000 living species. Given below are some uncommon birds. I identify them.

They are the gentle giants of the parrot species and one of the most popular pet birds, because of their endearing characteristics.

These social birds are \_\_\_\_\_ . (1)

The birds get its famous pink colour because of the algae and shrimps they eat. They eat with their head upside down in the water and rest by standing on one leg. They are \_\_\_\_\_ . (2)

The flights of these birds are amazing to watch. They can fly up, down, forward, backward, sideways and stop in midair. They are the only ones that can fly backwards. The smallest bird species, they are \_\_\_\_\_ . (3)

The birds are best known for their famous throat pouch. They use their elastic pouches to catch fish. They do not store fish in them, but simply use it to catch. They are \_\_\_\_\_ . (4)

The birds are flightless. They lay the largest egg in relation to their body size of any species of bird in the world. They are the national symbol of New Zealand. These nocturnal birds are \_\_\_\_\_ . (5)

## Help

Kiwi

Hummingbird

Macaw

Flamingo

Pelican

# Source Affairs

Here are pictures of some common things. Some come from plants and some come from animals. Classify them by writing their names in the space provided.
